

# Deliver a Personal Workspace to Every User

Ivanti® Environment Manager, powered by AppSense, decouples user settings and manages them separately from the desktop, allowing portability across devices. The result? Faster logons and personalized workspaces that users love, with less work for you.

## Unlock Your IT Service Desk

- **Ensure a Consistent User Experience**

Deliver consistent and optimal experiences with Office 365 using actions and attributes for items such as Outlook signatures, printing, drive access, menu items, and shortcuts. When customization is needed, we offer curated personalization templates to ensure your users' data is available across sessions.
- **Seamless Migration to Windows 10**

Personalization is OS-independent, ensuring a consistent experience across platform and devices (physical/VDI/DaaS). Control migration and Windows 10 features with our contextual policy engine.
- **Boost Productivity**

Accelerate logon times by employing our Just-in-Time execution to replace legacy scripts and Group Policies. Empower your users with a simple self-service workflow.
- **Stay in Compliance**

Easily apply highly granular policies specific to each user to comply with corporate and industry-based mandates.

## On-demand Personalization and Context-aware Policy Controls

### Environment Manager personalization provides:

- Fast logon times
- A fully personalized workspace experience, regardless of location or device
- A secure desktop environment that adapts based on user context

### Use Environment Manager Policy to:

- Enforce policy in real time throughout the user session, not just at login
- Help meet corporate and industry-based compliance mandates such as HIPAA, FINRA, and PCI
- Apply configuration settings in parallel for optimal user experience.

***“Without Environment Manager, we wouldn’t be able to deliver a truly personal desktop to our users.”***

*Joe Jabbour, Manager, End User Computing at Wilkie, Farr & Gallagher*

## Key Feature: Easy Onboarding of Applications and User Profiles

Ivanti Environment Manager is the only enterprise solution that enables standardized workspace environments to be fully personalized, all centrally controlled without the need for cumbersome Group policies, profiles, or scripts. Full desktops can be configured and business rules applied on-demand, enabling complaint, personalized virtual workspaces to be delivered quickly to thousands of users.

Environment Manager automatically self-heals files, registry items, services, and processes in real time to prevent user-introduced actions from compromising system integrity.

Lockdown, secure, and control specific applications. When migrating to the latest Microsoft Office release, policy control functionality can be applied, preventing users from connecting outside the corporate network when unnecessary (such as printing and distributing documents outside the network).

## Key Feature: Flexible Control

Migrate user personalization settings quickly and easily between physical and virtual workspaces. You can migrate users from PC or server-based computing environments to virtual desktops without having to re-create personalization settings. Profile data can also be migrated between operating systems and applications, enabling rapid workspace upgrades.

## Key Feature: Service Desk Utility

One of the most common and time-consuming tasks for IT support is resolving profile-related support cases. When profile corruption occurs, users can't work effectively and often complain that "it worked yesterday." Damaged or corrupt profiles are typically dealt with by resetting the profile and having users rebuild their personalization settings from scratch.

You can reduce support costs and the time repairing damaged profiles by using our scheduled snapshots of the profile and, if required, 'rolling back' to a previous known good profile for a user on a per-application basis. This web console enables admins to manage user settings at scale; for example, you may need to update an Application Setting for all your users.

## Make users and IT more productive.

Eliminate lengthy log ons, corrupted profiles, and poor application performance. Let us help you delight your users with a solution that offers:

- Contextual control  
Applying just-in-time settings only when required rapidly transforms the user experience.
- Cloud-ready  
Our agent technology and architecture enables customers to migrate their settings as required for their cloud and hybrid needs.
- Enterprise scalability  
Our solutions are proven to scale to more than 150,000 endpoints and incorporate industry-standard HA/DR best practices such as MS SQL Always-On and Load Balancing.

## Quick Start with Rapid Evaluation:

It's never been easier to try Ivanti for the first time with our Rapid Evaluation mode option. Our installation process takes care of all the heavy lifting. We also have a new evaluation install option that gets you up and running with a complete Ivanti installation in under 10 minutes.
