

Environment Manager / Policy Quick Reference

While Ivanti Environment Manager and Ivanti Environment Manager Policy offer many of the same benefits, there are some important differences between the two. Ivanti Environment Manager provides a complete set of desktop personalization and environment management policy capabilities.

It is sold as a standalone product and is also part of the Ivanti User Workspace Manager suite. Ivanti Environment Manager Policy is sold as a separate product that includes only the policy capabilities. It is also available as an extension to Ivanti Endpoint Manager. This table shows which capabilities are available in each solution.

Feature	Benefits	Environment Manager	Environment Manager Policy
AUTOMATION	Triggers tasks and Automation module in response to desktop activity.	✓	✓
CACHE ROAMING/CONTAINERIZATION	Accelerate Office 365 and other applications on virtual desktops using VHD containers.	✓	✓
GROUP POLICY IMPORT AND REPLACEMENT	Import directly from Active Directory and take settings from ADM/ADMX templates so Group Policies run faster and with more context.	✓	✓
LOGON SCRIPT REPLACEMENT	Faster logons, graphical console, multi-threaded engine.	✓	✓
POWERFUL, CONTEXTUAL RULES ENGINE	Apply policy settings and profiles to much more than just OUs and AD groups.	✓	✓
WINDOWS DESKTOP AND APPLICATION UI LOCKDOWN	Hide and restrict access to edit boxes, buttons, and dropdown menus.	✓	✓

Feature	Benefits	Environment Manager	Environment Manager Policy
ROAM USER PROFILES	Reduce profile corruption, faster logon times, happier users. [Should only be listed for Environment Manager]	✓	
END USER SELF-SERVICE	Users can roll back their own profiles via a self-service tool or existing service management solutions, reducing support calls.	✓	
LEARNING MODE	Guided application profiling for settings capture.	✓	
MULTI DATACENTER AND CLOUD SUPPORT	Replication, failover, and central management across datacenters with any SQL Edition, on-premises, or cloud-hosted.	✓	
OFFLINE SUPPORT	Caching and sync engine for online and offline desktops and laptops.	✓	
SNAPSHOTS, PROFILE ROLLBACK, AND BULK CHANGES	Web UI with delegated admin for the service desk to roll back to a previous state, known good, or make bulk profile changes.	✓
