Growth through Challenges

Collectively, we faced big obstacles

- Global economy headwinds
- Talent shortages
- Increase in threat actors

Together, we rose to the challenges

- Prudent financial oversight
- Technology that enables people to do more with less
- Increased focus on risk – both managing and preventing

Ivanti Takes a Holistic Approach to Security

Ivanti prioritizes building and maintaining secure products across all phases of the product lifecycle. We continue to make meaningful investments to accelerate our security initiatives and adhere to best practices when developing our solutions.

Adherence to Secure Application Development Standard

Increased exposure management focus and implementation of industry best practices and processes

Investment in security expertise and security team growth of 8X across our portfolio

Implementation of robust training program for secure software development

Renewed Focus on Operational Rigor for Product Development

Guiding principles for quality product delivery

Solve our customer's business problems

Deliver with a sense of urgency

Increase operational excellence

Respond rapidly to address product issues

Focus on quality and engineering excellence

Market Trends Impacting IT & Security

Evolving threat landscape

- Rising threat actors
- Nefarious use of AI and expanded attack surface
- Ransomware & breaches

IT & Security Alignment

- Workflow & Automation
- Data visibility
- AI-driven efficiencies
- AI security

Autonomous endpoints

- Fear of endpoint automation limiting potential
- Automation lessening human burden not replacing
- Improved remediation and DEX

Evolving Threat Landscape

58%

Organizations say ransomware most critical threat in 2025

62%

Security professionals say data silos slow security response times

41%

IT workers say helpdesk tickets are up due to security incidents / outages

$4.88m

Average cost of a data breach in 2024

AI-powered threats loom large for security professionals

Q: Which of these threats will become more dangerous due to generative AI?

Phishing **45%**
Software vulnerabilities **38%**
Ransomware attacks **37%**
API-related vulnerabilities **34%**
DDoS attacks **31%**
Poor encryption **27%**
Misconfigurations **26%**
Compromised credentials **26%**
Insider threat **26%**
Supply chain threats **25%**

…BUT 1 in 3 organizations don’t have a documented strategy to address generative AI risks

Successful digital transformation requires a positive end-user experience, but most organizations still don’t prioritize digital employee experience (DEX) as a critical variable.

29%

of organizations rank improving digital employee experience as the lowest priority among their IT initiatives.

Leverage Autonomous Endpoint Management to Increase Security and Reduce Human Burden

Gartner says autonomous endpoint management is the most significant advancement in endpoint management in over a decade.

Yet, IT is hesitant to trust automation in this use case.

What sets best-in-class organizations apart when it comes to cybersecurity preparedness

Qualities of the most prepared firms when it comes to cybersecurity

They are most likely to invest in exposure management.

They are more rigorous when evaluating third-party software security.

They are most likely to view cybersecurity as a shared responsibility between the software vendor and customer.

How IT and Security leaders drive alignment between their teams to better support the business

1 Align IT and security priorities

- Get leadership buy-in
- Develop a 1-to 3-year roadmap aligning key CIO and CISO priorities with business objectives

2 Empower employees with flexibility

- Consider employee values
- Deliver flexible infrastructure

3 Gain a comprehensive view of your IT estate

- Drive up helpdesk throughput
- Improve security preparedness

Ivanti Neurons Platform provides a variety of **pre-built automation solutions.**
