

IT Asset Management (ITAM)

DO YOU KNOW WHAT ASSETS YOU HAVE?

...are you sure?

Here's how ITAM can help.

1 Survive a Software Audit

68% of organizations can expect at least one software audit request in the next 12 months.¹

50% increase from 2013 to 2014, of the number of workers who reported their employers to authorities due to unlicensed software.²

\$263,000 is the average true-up cost for companies with over \$50 million in revenue.³

2 Avoid Financial Risk

80% of businesses overpay for software licenses.⁴

3 Safeguard Information

89% of ex-employees walk away with their passwords and retained access.⁵

475 is the average amount of unique third-party applications per organization connected to corporate systems.⁶

4 Increase Productivity

53% of all data loss and systems downtime are caused by hardware failure.⁷

60% of software asset managers still spend most of their workday conducting data analysis by hand.⁸

Use ITAM to track and maintain hardware and software assets through their entire lifecycle, reclaim unused licenses, support security efforts, manage vendors and contracts, and cut costs up to 50%.⁹
