

Do you know what  
your QR code is up to?

QR code popularity continues to rise...

of respondents have noticed an increase in QR code use since March 2020

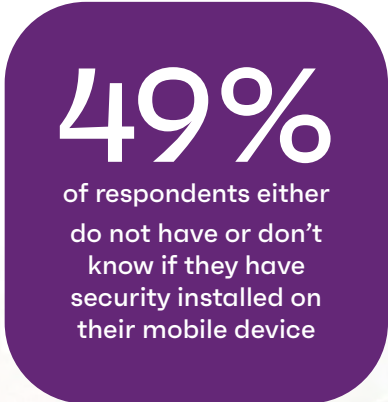

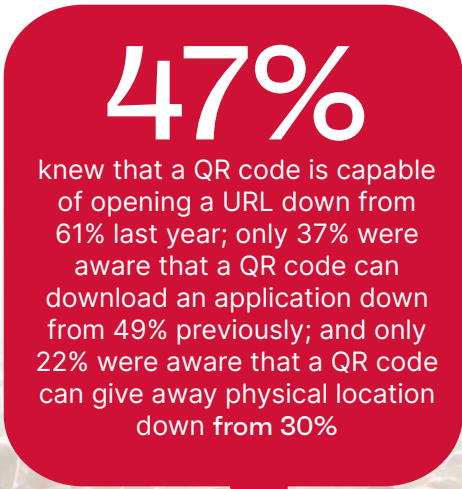

of people used a QR code in the last year to make a payment or complete a financial transaction for the first time ever, and 54% of those payments were in the last 3 months alone

usage in doctor's offices, pharmacies and hospitals this year, has risen from 9% in 2020

But they could be putting your security at risk if you're not careful
