Happy New Year! Celebration continues in 2019 with a mild January Patch Tuesday. But, make sure you've deployed Microsoft's emergency patch, released post December Patch Tuesday, so attackers with a New Year's zero-day resolution don't suck all the fun out of your month. Also, take note of the public disclosure, and take this calm before whatever comes next to catch up on Java support changes going forward. Java SE 8 will soon receive its last public update.

|                  | Bulletins  | CVE Count | Impact                 | Vendor Severity | Ivanti Priority | Threat Risk | Notes                                | User Targeted | Privilege Management Mitigates Impact |
