

Summary

Optimize Your ESM Workflows with Automation

These are some of the ways you can apply automation to help optimize your daily workflows to streamline manual tasks.

Self-Healing Bots

- True edge healing
 - Scaled to enterprise
- Proactive remediation
 - Address device issues before users even know they're there

Asset Management

- Discovery ---> CMDB
 - Discovers assets and populates CMDB automatically
- Lifecycle management
 - Both assets & software
- Spend control
 - "Shopping cart" effect

Service Automation

- Employee administration
 - Starters, movers, leavers
- Audit workflows
 - Standardized compliance
- Approvals workflows
 - Manual ---> automatic
